4. ABSTRACT OF THE INVENTION (5-10 lines):
 (TO BE COMPLETED AFTER FILLING IN THE FORM. Include the need and the proposed solution to said need)

5. THE INVENTION:

(Describe the invention in detail including all essential elements. If you have a draft of a scientific article, a presentation, a grant proposal etc. related to the invention please also send by e-mail, in a separate file)

Keywords: (Please provide 5-10 keywords that describe the main features of the invention)

I. BACKGROUND (1-2 pages):

(Provide details on the field of invention, what is common knowledge in the field and what are the pitfall and unanswered needs)

II. THE PROBLEM THE TECHNOLOGY SOLVES (1-2 pages):

(Describe in detail the need identified by you for which the invention is a solution)

III. THE COMPONENTS OF THE INVENTION (3-5 pages):

(Describe in detail the elements of the invention that are crucial for its function. The elements could be parts of a device, a molecular formulation, physical characteristics, computational elements, working conditions, structural features such as size, shape, material etc. Make sure to include all the elements.)

IV. NEW FEATURES AND ADVANTAGES (1-2 pages):

(Based on your knowledge and expertise, describe in detail what is new (not previously known) in the solution proposed, why it is important, and what are the benefits compared to existing solutions)

V. FIGURES AND ADDITIONAL DATA (1-4 pages):

(Provide figures, sketches, pictures, graphs, statistics, lists, sequences etc.)

VI. PRELIMINARY RESULTS (3-5 pages):

(Where applicable, provide results such as in vitro, in vivo, prototype, simulation, working computer program, statistics, etc.)

6. PRIOR ART – SEARCH FOR RELEVANT PUBLICATIONS (PATENTS AND OTHER PUBLICATIONS):

- + Are there publications by you (the inventors) or by others working in the field, with a solution to a similar problem?
- + Have you conducted a patent search related to the Invention? The following links may be used for conducting a patent search:
